

'A Remote Depot' by J P Models

Modern image EM gauge layout depicting a ballast loading yard, featuring a small fleet of radio controlled vehicles.

Wagons are brought in, filled with gravel from the storage bins by one of the resident wheel loaders, before being taken away by the Class 08 shunter. Road vehicles (trucks, buses, vans and cars) arrive and depart all day - plus there are regular aggregate deliveries by tipper lorry, and flatbed lorries are loaded/unloaded by telehandler and forklift trucks.
